

A.A.U CHAMO INTERNATIONAL BUSINESS AGENCY SERVICES LIMITED

Enterprise ERP Dedicated Manual Series

Volume 2: Sales Officer & Point of Sale (POS) Counter Manual

Module 02 Focus: Retail Checkout, Barcode Scanning, Split Payments & Cash Reconciliation

[!NOTE] **WELCOME SALES OFFICERS & CASHIERS** This manual provides simple, step-by-step instructions for operating the **Point of Sale (POS)** counter, handling customer checkouts, accepting split payments, printing receipts, and closing your daily cash drawer session.

1. Executive Summary & Role Definition

As a **Sales Officer** or **Cashier** at AAU Chamo, your primary responsibility is to deliver fast, accurate, and secure customer transactions at the retail counter.

Primary Duties

- 1. **Drawer Session Opening:** Record the starting cash float at the start of your shift.
- 2. **Fast Order Processing:** Scan product barcodes, adjust item quantities, and apply authorized discounts.
- 3. **Customer Onboarding:** Link sales to existing customer profiles or register new customers on the fly.
- 4. **Payment Collection:** Accept Cash, Card Transfers, Agent Wallets, or Split Payments.
- 5. **Receipt Issuance:** Print official thermal receipts for every completed sale.
- 6. **End-of-Shift Reconciliation:** Count physical drawer cash and reconcile any variances before closing.

2. Navigating the POS Counter Interface

The POS interface is designed for speed and ease of use on both desktop screens and touch-screen POS terminals.

3. Section 1: Starting Your Shift (Opening POS Drawer)

Before processing any sales, you must open a **POS Drawer Session** to establish your starting cash float:

Step-by-Step Instructions

1. Log in to the ERP using your **Sales Officer** credentials.
2. From the main menu, click **Point of Sale (POS)**.
3. The system will detect that no active drawer session is open and prompt you with the **Open Drawer Session** screen.
4. Count the physical cash given to you by the station manager for change.
5. Enter the **Opening Cash Float** amount (e.g., ₦ 10,000.00).
6. Click **Start Session**.
7. The status indicator at the top right will change to **Drawer Status: OPEN** . You are now ready to make sales.

[!WARNING] You cannot process sales without an open drawer session. The system enforces 1 active drawer session per cashier to prevent cash misallocations.

4. Section 2: Processing Customer Checkout

Step 1: Adding Items to the Cart

- **Using Barcode Scanner:** Point your physical handheld barcode scanner at the product item. The barcode will automatically scan and add 1 unit to the cart.
- **Using Manual Search:** Type the product name or code (e.g., **Motor Oil**) into the search bar and tap the product card to add it to the cart.
- **Adjusting Quantities:** Tap the + or - buttons next to any cart item to change quantities.

Step 2: Attaching Customer Profile

1. In the **Customer** section, type the customer's phone number or name.

2. If the customer exists, select their name from the drop-down list.
3. **If New Customer:** Click + **Quick Add Customer**, enter their Name and Phone Number, and click **Save**.
The customer is instantly created and linked to the order.

Step 3: Applying Discounts (Optional)

- If authorized by management, you can apply a percentage or fixed amount discount by entering the discount figure in the **Discount Field**.
- The cart will instantly recalculate the **Total Due**.

Step 4: Collecting Payment & Selecting Payment Method

Select the customer's preferred payment method:

Option A: Exact Cash Payment

1. Click **Cash Payment**.
2. Enter the **Cash Received** from the customer (e.g., ₱ 60,000.00).
3. The screen will automatically display the exact **Change Due** to hand back to the customer (e.g., **Change: ₱ 150.00**).
4. Click **Complete Sale**.

Option B: Bank Transfer / POS Card Terminal

1. Click **Transfer / Card**.
2. Verify that the bank alert or POS slip is approved.
3. Enter the transaction reference code (optional).
4. Click **Complete Sale**.

Option C: Split Payment (Cash + Transfer)

If a customer wants to pay part in cash and part via bank transfer:

1. Click **Split Payment**.
2. Enter Cash Amount: e.g., ₱ 20,000.00.
3. Enter Transfer Amount: e.g., ₱ 39,850.00.
4. The system confirms **Total Paid = Total Due**.
5. Click **Complete Sale**.

5. Section 3: Receipt Issuance & Order Printing

Upon completing a sale, the ERP automatically records the transaction in the financial ledger, deducts item stock from your station's inventory balance, and generates the official receipt.

Receipt Options

- **Auto-Print Thermal Receipt:** Sends the 80mm/58mm formatted receipt directly to your thermal receipt printer.

- **Reprint Receipt:** If paper jams or the customer requests a duplicate, click **Reprint Receipt**. The copy will be watermark-labeled **DUPLICATE COPY** for security compliance.

6. Section 4: End-of-Shift Cash Drawer Closing & Reconciliation

At the end of your working shift, you must close and reconcile your cash drawer:

Step-by-Step Instructions

1. Click **Close Drawer Session** at the top right of the POS screen.
2. The ERP will display the **Shift Summary**:
 - Opening Cash Float (e.g., ₦ 10,000.00)
 - Total Cash Sales Collected (e.g., ₦ 150,000.00)
 - Total Transfers / Cards Collected (e.g., ₦ 85,000.00)
 - **Expected Drawer Cash:** ₦ 160,000.00
3. Physically count all cash banknotes inside your drawer.
4. Enter the **Counted Cash** figure in the input box (e.g., ₦ 160,000.00).
5. **Variance Calculation**:
 - **Zero Variance (Balanced):** Counted cash matches Expected cash exactly.
 - **Shortage (Negative Variance):** Cash in drawer is less than sales recorded. Enter an explanatory note in the remarks box.
 - **Surplus (Positive Variance):** Cash in drawer is more than sales recorded. Enter an explanatory note.
6. Click **Finalize & Close Session**.
7. Print the **Shift Closing Report** and submit it along with your cash bag to the Finance Officer or Station Manager.

7. Section 5: Troubleshooting Guide for Sales Officers

Problem	Possible Cause	Recommended Solution
Barcode scanner is not adding items	Scanner unplugged or focus off search bar	Click inside the search input box before scanning. Ensure USB scanner cable is plugged in.
Sale rejected with "Insufficient Stock" error	Inventory balance is zero at station	Contact Station Manager to perform a stock transfer or inventory balance check.
Thermal printer is not printing	Printer offline, out of paper, or power off	Check green power light on printer. Insert a new 80mm thermal paper roll with thermal side facing up. Click Reprint .
Customer requests order cancellation after payment	Customer changed mind or wrong item	Do not issue cash manually. Click Request Cancellation → Select Reason. Your manager will approve it and auto-refund the customer.
