Enterprise ERP Dedicated Manual Series

Volume 7: Auditor & Compliance Inspection Manual

Module 12 & 13 Focus: Automated Reports, Document Lineage & Cryptographic Audit Verification

[!NOTE] **WELCOME AUDITORS & COMPLIANCE OFFICERS** This manual provides step-by-step instructions for conducting internal and external compliance audits, generating 17 automated reports, tracking document lineage, and verifying database cryptographic hash chain integrity.

1. Executive Summary & Role Definition

As an **Auditor** or **Compliance Officer** at AAU Chamo, your primary responsibility is to independently verify financial accuracy, inspect operational audit trails, and ensure system compliance across all physical stations.

Primary Duties

1. **Read-Only Inspection:** Possess company-wide read-only visibility across ledgers, inventory, sales, and attendance without risk of accidental data mutation.
 2. **Automated Reporting:** Run and export the 17 standardized operational and financial reports into CSV format for independent analysis.
 3. **Document Lineage Verification:** Track original document creation, version lineages, and reprint event logs.
 4. **Cryptographic Chain Audit:** Verify the SHA-256 hash digest chain to confirm zero database tampering.
-

2. Section 1: Read-Only Audit Scope & Security Controls

Auditors operate under strict **Read-Only Authority**:

- You can inspect every screen, transaction, cash drawer report, and inventory balance across all stations.
 - The ERP interface automatically hides or disables all action buttons (*Create, Edit, Delete, Approve, Post*) for Auditor logins.
-

3. Section 2: Executing & Exporting 17 Standardized Reports

The **Reporting & Analytics Module** provides 17 pre-built reports covering every operational division:

3.1 Step-by-Step Report Execution

1. Log in to the ERP using your **Auditor** credentials.
2. Navigate to **Reporting & Analytics** → **Report Centre**.

3. Select the desired Report Category:
 - **Sales & Revenue Reports:** Consolidated Sales, Sales by Station, Profit Margin Analysis.
 - **Inventory & Stock Reports:** Stock On Hand Valuation, Movement Ledgers, Transfer Audits.
 - **Cargo & Freight Reports:** AWB Tonnage Summary, Freight Revenue by Destination Hub.
 - **HR & Punctuality Reports:** Attendance Punctuality Log, Staff Shift Hours.
 - **Financial Reports:** Cashbook Reconciliation, P&L Statement, Trial Balance Summary.
 4. Set Filters: Select Date Range and Station Scope (*All Stations* or *Specific Location*).
 5. Click **Run Report**.
 6. Click **Export Report (CSV)** to download raw data for Microsoft Excel or audit software analysis.
-

4. Section 3: Cryptographic Audit Chain Verification

AAU Chamo ERP incorporates an append-only **Cryptographic Hash Chain** for all system transactions (**AuditEvent**).

```
[ Genesis Block ] -> [ AuditEvent #1001 (Hash A) ] -> [ AuditEvent #1002 (Hash B) ] -> [ Current ]
```

3.1 Step-by-Step Integrity Audit

1. Navigate to **Compliance** → **Audit Verification**.
 2. Click **Execute Hash Chain Integrity Check**.
 3. The system recalculates SHA-256 hash digests sequentially from the initial system event to the latest record.
 4. **Audit Result Interpretation:**
 - **Status 200 (OK):** 100% Chain Integrity Verified. No records have been modified, backdated, or deleted.
 - **Status 409 (Mismatch):** Identifies the exact record ID where chain continuity was broken, alerting you to unauthorized direct database intervention.
-

5. Section 4: Document Lineage & Reprint Fraud Auditing

To prevent fraud associated with duplicate invoices or unauthorized document reprinting:

4.1 Inspecting Document Lineage

1. Navigate to **Document Center** → **Document Search**.
2. Search by Document ID or Order Reference (e.g., **DOC-89012**).
3. View the **Document Lineage Tree**:
 - Original Creator ID & Timestamp
 - Attached Version History
 - Digital Signature Hash

4.2 Auditing Document Reprint Logs

1. Open **Document Center** → **Reprint Audit Log**.

2. Filter by Document Type (*POS Receipt, Invoice, AWB Shipping Tag*).
 3. Review every reprint request:
 - **Requester Name** & Station ID
 - **Reason Provided for Reprint** (e.g., *Printer paper jam*)
 - **Reprint Count Number** (Duplicate copies carry mandatory watermark stamps)
-

6. Section 5: Auditor Inspection Checklist

Perform these routine checks during monthly or quarterly compliance audits:

- ☐ **Step 1:** Execute Cryptographic Hash Chain Verification (</api/audit/verify>).
 - ☐ **Step 2:** Reconcile Total POS Sales with Total Bank Cash Deposits across all stations.
 - ☐ **Step 3:** Inspect Maker-Checker Stock Adjustment logs for unapproved delta entries.
 - ☐ **Step 4:** Verify Agent Wallet Continuity Statements (Opening Balance + Deposits - Bookings = Closing Balance).
 - ☐ **Step 5:** Export Staff Attendance Punctuality Log and cross-reference GPS location pins.
-
